## 32

NUMBER 1, MAY

*Full Papers*

WILLIAM P. WERGIN, LARRY D. DUNKLE, JAMES L. VAN ETTEN, GRANT ST. JULIAN, AND LEE A. BULLA, JR. Microscopic Observations of Germination and Septum Formation in Pycnidiospores of *Botryodiplodia theobromae* ..... 1

DENIS MORAN, JOHN D. PALMER, AND PAT G. MODEL. The Role of Phenylalanine in Differentiating Amphibian Melanocytes ..... 15

MARILYN B. RENFREE AND C. H. TYNDALE-BISCOE. Intrauterine Development after Diapause in the Marsupial *Macropus eugenii* ..... 28

MARILYN B. RENFREE. Proteins in the Uterine Secretions of the Marsupial *Macropus eugenii* ..... 41

ROBERT A. KOSHER AND ROBERT L. SEARLS. Sulfated Mucopolysaccharide Synthesis during the Development of *Rana pipiens* ..... 50

HIDEHIKO ENDO AND FUNAN HU. Pigment Cell Development in Rhesus Monkey Eyes: an Electron Microscopic and Histochemical Study ..... 69

CHRISTIANE PLAS, FRANÇOIS CHAPEVILLE, AND ROBERT JACQUOT. Development of Glycogen Storage Ability under Cortisol Control in Primary Cultures of Rat Fetal Hepatocytes ..... 82

BARRY FABIAN AND FRED WILT. The Incorporation of 5-Bromodeoxyuridine into DNA of the Area Opaca Vasculosa of Chick Embryos ..... 92

LYNETTE FEENEY. The Interphotoreceptor Space. I. Postnatal Ontogeny in Mice and Rats ..... 101

LYNETTE FEENEY. The Interphotoreceptor Space. II. Histochemistry of the Matrix ..... 115

NOËL DE TERRA. Further Evidence for Cortical Control over Replication of the Macronucleus and Basal Bodies in *Stentor* ..... 129

JOSEPH T. TUPPER. Potassium Exchangeability, Potassium Permeability, and Membrane Potential: Some Observations in Relation to Protein Synthesis in the Early Echinoderm Embryo ..... 140

CAROLE R. CARROLL AND E. B. VAN DEUSEN. Experimental Studies on a Mutant Gene (*cl*) in the Mexican Axolotl Which Affects Cell Membrane Formation in Embryos from *cl/cl* Females ..... 155

RAYMOND SAXOD. Developmental Origin of the Herbst Cutaneous Sensory Corpuscle. Experimental Analysis Using Cellular Markers ..... 167

EDUARDO ZEIGER AND LILIANA CARDEMIL. Cell Kinetics, Stomatal Differentiation, and Diurnal Rhythm in *Allium cepa* ..... 179

*Brief Notes*

MARKO ZALOKAR. Transplantation of Nuclei into the Polar Plasm of *Drosophila* Eggs ..... 189

GERDA E. MARK, JULIE H. CHAMLEY, AND G. BURNSTOCK. Interactions between Autonomic Nerves and Smooth and Cardiac Muscle Cells in Tissue Culture ..... 194

Number 2, June

*Full Papers*

G. Burton Ayles, Thomas G. Sanders, Barry I. Kiefer, and David T. Suzuki. Temperature-Sensitive Mutations in *Drosophila melanogaster*. XI. Male Sterile Mutants of the Y Chromosome ..... 239
Randall W. Reyer, Robert A. Woolfitt, and Loraine T. Withersty. Stimulation of Lens Regeneration from the Newt Dorsal Iris When Implanted into the Blastema of the Regenerating Limb ..... 258
Geoffrey G. Foster. Temperature-Sensitive Mutations in *Drosophila melanogaster*. XIII. Temperature-Sensitive Periods of the Lethal and Morphological Phenotypes of Selected Combinations of Notch-Locus Mutations ..... 282
David A. Wright and Stephen Subtelny. Effects of Haploidy and Hybridization on the Activities of Four Dehydrogenases in Frog Embryos ..... 297
Rudolf A. Raff and John F. Kaumeyer. Soluble Microtubule Proteins of the Sea Urchin Embryo: Partial Characterization of the Proteins and Behavior of the Pool in Early Development ..... 309
Gregory W. Erdos, Ann W. Nickerson, and Kenneth B. Raper. The Fine Structure of Macrocyst Germination in *Dictyostelium mucoroides* ..... 321
J. H. Miller and D. Epel. Studies of Oogenesis in *Urechis caupo*. II. Accumulation during Oogenesis of Carbohydrate, RNA, Microtubule Protein, and Soluble Mitochondrial, and Lysosomal Enzymes ..... 331
John H. Postlethwait and Howard A. Schneiderman. Pattern Formation in Imaginal Discs of *Drosophila melanogaster* after Irradiation of Embryos and Young Larvae ..... 345
Monica Guerra, John H. Postlethwait, and Howard A. Schneiderman. The Development of the Imaginal Abdomen of *Drosophila melanogaster* ..... 361
Clifton A. Poodry, Linda Hall, and David T. Suzuki. Developmental Properties of *Shibire*$^{ts1}$: A Pleiotropic Mutation Affecting Larval and Adult Locomotion and Development ..... 373

David A. Newsome and Kenneth R. Kenyon. Collagen Production *in Vitro* by the Retinal Pigmented Epithelium of the Chick Embryo ..... 387
Henry deF. Webster, John R. Martin, and Maureen F. O'Connell. The Relationships between Interphase Schwann Cells and Axons before Myelination: A Quantitative Electron Microscopic Study ..... 401
John R. Martin and Henry deF. Webster. Mitotic Schwann Cells in Developing Nerve: Their Changes in Shape, Fine Structure, and Axon Relationships .. 417
Arnold M. Clark, Robert M. Petters, and Peter J. Bryant. Patterns of Genetic Mosaicism in the Antennae and Legs of *Habrobracon juglandis* ..... 432

*rief Notes*

V. D'Amelio, C. Cirotto, and E. Costantino-Ceccarini. Embryonic and Adult Chick Haemoglobins: Their Reaction with *p*-Chloromercury Benzoate ... 446
Cole Manes. The Participation of the Embryonic Genome during Early Cleavage in the Rabbit ..... 453
UTHOR INDEX ..... 460
Subject Index for Volume 32 will appear in the December 1973 issue as part of a cumulative index for 1973.

Editor's Index ..... f-24

## Information for Authors

*Developmental Biology* will publish in English original papers bearing on problems of development in the broadest sense; it will contain papers dealing with embryonic and postembryonic development, growth, regeneration, and tissue repair, both of plants and animals. The journal will serve as meeting ground for studies on development employing techniques of a wide range of disciplines, e.g., biochemistry, biophysics, cytology, experimental morphogenesis, teratology, genetics, immunology, microbiology, pathology, pharmacology and physiology.

*Articles* should not exceed 15,000 words and should be accompanied by an abstract that gives, in 200 words or less, a synopsis of the work including methods and results. *Brief Notes* must not exceed 2000 words. The usual format is: abstract, introduction, methods and materials, results, and discussion, but authors are encouraged to present their material in the most logical and appropriate form. Indicate the address for galley proof. In order to save time, page proofs will not be sent to authors. Our aim is to keep the publication time less than 6 months. Two copies of the manuscript (the original and one carbon) and two copies of the figures should be mailed to Dr. Elizabeth Hay, Department of Anatomy, Harvard Medical School, Boston, Massachusetts 02115.

*Manuscripts* should be concise and consistent in style, spelling, and use of abbreviations. They must be typewritten, double-spaced, on one side of white bond paper about 8-½ x 11 inches in size, with the pages numbered consecutively. Include with full length articles a running page headline not exceeding 35 letters and spaces. Use footnotes sparingly, if at all. Cite them, using superscript numbers, in consecutive order in the text. Type them consecutively on a separate sheet. Acknowledgments and figure legends should also be typed, double-spaced, as separate sections.

*Tables* should be used to condense data referred to in the text. They should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text, and collected at the end of the manuscript. Give each table a concise, descriptive heading. Tables should be so composed that the material they contain can be grasped without reference to the text.

*Figures* should be numbered consecutively in the order of their appearance and each should have a descriptive legend. Indicate magnifications. Line drawings should be made with India ink on smooth white paper or the equivalent. Where original drawings for the printer's use are larger in size than 8-½ x 11, enclose smaller, unmounted prints for editorial use. Photographs should be unmounted, actual size, labeled and ready for half-tone reproduction. Use glossy prints with strong contrast; photo-offset printing reduces contrast. When several figures make up a plate, mount them on the back of a piece of photographic paper or indicate in some other way how they should be mounted. Use cardboard only to protect the package in mailing. The engraver will tool thin white lines between mounted figures later. Maximum size for figures is 5-½″ x 8″ for double column and 2-⅝″ x 8″ for single column. Where large micrographs are especially helpful, the full page may be utilized (6-⅞″ x 10″). To allow for trimming by the printer, add ⅛″ to width and ¼″ to length of the original print, and place lettering, including figure numbers, no closer than ¾″ to the margin. Figure numbers and lettering should be uniform size, 4–7 mm high. Indicate on the galley proof where the figures are to be placed. Mark all figures with the author's name and address. The author will defray the expense for colored plates. Two pages of half-tone figures per article will be published without cost to the author; a charge of $50 per page will be required for pages in excess of this number. Fifty gratis reprints are supplied. Additional reprints may be ordered when galley proof is returned.

*References* to the literature may be cited in one of the following forms: Doe (1955) has observed that . . . ; (Doe, 1955; Doe *et al.*, 1960); (Doe, 1961, p. 250). Use suffixes a, b, etc. following the date to distinguish two or more works by the same author(s) in the same year, e.g., Doe 1960a, b. Arrange literature citations in the bibliography alphabetically according to the surname of the author, using the following order of items: author(s), date of publication, title of article or book, journal name, volume number, inclusive pages, publisher and city (for books only). Abbreviate titles of journals in accord with Chemical Abstracts' *Service Source Index* (1969 Edition).

Classify your manuscript for editor's indexing when you submit it by answering the following questions:

(1) This manuscript is best described under the category, Developmental Biochemistry____, or Developmental Cytology____, or Developmental Genetics____, or Developmental Physiology____, or Experimental Morphogenesis____.

(2) Two additional key words or phrases for editor's indexing are:

_____; _____.

(3) I $\begin{matrix}\text{do}\\\text{do not}\end{matrix}$ believe the paper should be included in the Journal's list of possible graduate and undergraduate laboratory experiments.

*Announcements* should be sent to the Editor-in-Chief to arrive by the 15th of the month preceding the issue in which the material is to appear. *News, opinion and letters* should be sent to Dr. Eugene Bell, Department of Biology, Massachusetts Institute of Technology, Cambridge, Massachusetts 02138, U.S.A. The correspondence section is not to be used as a medium for rapid publication of data. It is a forum for active exchange of ideas and opinions about research in developmental biology. Half-tone figures are not accepted, but in suitable cases line drawings will be. Material related to *Current Literature* should be sent to Dr. Francis J. Manasek, Department of Anatomy, Harvard Medical School, Boston, Massachusetts 02115, U.S.A.
